Android Developer in Agra, India

## Summary

I take an Android app from idea to live release alone, then keep it updated and supported. Two apps shipped, 63,000+ downloads. I can be useful on day one.

## Work History

*Solo Developer, Whispry (voice typing app for Android, my own project) | 2026*

- Built alone an app that types for you: hold a button, speak, and your words appear in any app. Saves people time on every message and note. [Kotlin, Jetpack Compose, Android SDK, Overlay Windows, Foreground Services, MVVM]
- Let users pick their own AI service, so their data stays theirs and the app costs me nothing to run. [REST APIs, Retrofit, OkHttp, Hilt, Dependency Injection]
- Works with long audio files in the background, in 11 languages, including Hindi-English mix (Hinglish). [WorkManager, Coroutines, Room, Localization, Background Processing]
- Set up automatic releases and in-app updates. Shipped 3 public versions. [CI/CD, GitHub Actions, Gradle, Git, Versioning]

*Lead Developer, Convx (free music app for Android, my own open-source project) | 2026 to Current*

- Took an open-source music app and rebuilt it into a free app **63,000+ people have downloaded**. Over half of today's code is mine. [Kotlin, Android SDK, Jetpack Compose, Git, GitHub]
- Gave the app a smooth, premium look and fixed slow scrolling, so it feels fast even on high-speed phone screens. [Jetpack Compose, Custom UI, Animations, Performance Optimization, Material Design]
- Connected the app to many outside music and lyrics services, so users find and play any song in one place. [REST APIs, Retrofit, OkHttp, JSON, Coroutines]
- Added the features users asked for: listening offline, lyrics that follow the song, car support, and listening together with friends. [Media3/ExoPlayer, Room, Android Auto, WebSockets, Foreground Services]
- Set up automatic app releases and updates, and answer bug reports and review fixes from other developers, so users get safe updates quickly. [CI/CD, GitHub Actions, Gradle, Git, Code Review]
- Kept users' data private: no ads and no tracking. [Data Privacy, Secure Coding, DataStore, MVVM]

## Education & Certificates

*MCA (Master of Computer Applications), Dr. Bhimrao Ambedkar University, Graduated 2025*

*B.Voc in Robotics and Artificial Intelligence, Dayalbagh Educational Institute, Graduated 2022*

## Skills

Kotlin, Java, Jetpack Compose, Android SDK, Media3/ExoPlayer, Room, Hilt, Coroutines, MVVM, REST APIs, Git, GitHub Actions
