Projects

Convx, free Android music app (my own open-source product, github.com/cosmictaserdev-creator/Convx) | *Jul 2026 to Current*

- Rebuilt an open-source music app (forked from vivi-music) into my own product in **Kotlin and Jetpack Compose**: **63,000+ downloads** from GitHub releases and 489 stars on my repo. I wrote 289 commits and over half of today's code.
- Fixed choppy scrolling on 120 Hz screens: found slow frames with profiling, then baked heavy blurs into images and froze the glass backdrop while scrolling.
- Built the frosted-glass look: live backdrop blur and refraction drawn on the GPU inside Compose, so buttons visibly bend the album art behind them.
- Organized as **MVVM with Hilt and Room** across 22 Gradle modules. One **Media3/ExoPlayer** player handles YouTube Music and JioSaavn sources, offline downloads and Android Auto.
- Own every release: **CI/CD with GitHub Actions** builds signed APKs and the app updates itself. I review pull requests from outside developers. 34 automated test files.

Whispry, voice typing app for Android (solo project, github.com/cosmictaserdev-creator/whispry) | *May 2026 to Current*

- Built alone in **Kotlin and Compose**: hold a button, speak, and the text is typed into any app, through a floating button or a keyboard button.
- Design choice: users bring their own AI key (Groq or any OpenAI-compatible **REST API**), so their voice goes straight to the AI company, never through my server, and hosting costs me nothing.
- Long recordings are transcribed in the background with **Coroutines and WorkManager**, even if the app is closed. 11-language interface and Hinglish output.
- Signed releases are built by CI/CD on every git tag. 20 automated test files.

Open Source Contribution

- Added a custom UI feature to **Echo Music**, an open-source Android music app. The maintainers accepted my pull request (the project is no longer online).

Education & Certificates

MCA (Master of Computer Applications), Dr. Bhimrao Ambedkar University, Graduated 2025

B.Voc in Robotics and Artificial Intelligence, Dayalbagh Educational Institute, Graduated 2022

Skills

Kotlin, Java, Jetpack Compose, Android SDK, Media3/ExoPlayer, Room, Hilt, Coroutines, MVVM, REST APIs, Git, GitHub Actions
